OpenCV for Unity is an Assets Plugin for using **OpenCV** from within **Unity**.
● Since this package is **a clone of OpenCV Java**, you are able to use the same API as OpenCV Java 4.5.0(git: opencv, opencv-contrib).
● You can image processing in **real-time** by using the **WebCamTexture** capabilities of Unity. **(real-time face detection works smoothly on iPhone 5)**
● Provides a method to interconversion of **Unity's Texture2D** and **OpenCV's Mat**.
● **IDisposable** is implemented in many classes.You can manage the resources with the "**using**" statement.
● **Examples of integration with other publisher assets** are available.（e.g. PlayMaker, NatDevice, NatCorder）

WebGL Setup Procedure
- "OpenCVForUnity/Plugins/WebGL/unity_version/opencvforunity.bc" – Select platform WebGL in Inspector. By Selecting MenuItem [Tools/OpenCV for Unity/Set Plugin Import Settings], You can easily set up.

- Put the file that you want to use for Utils.getFilePathAsync() in the "Aseets/StreamingAssets/". In Case of WebGL platform, you need to use Utils.getFilePathAsync() instead of Utils.getFilePath(). (haarcascade_frontalface_alt.xml is for OpenCVForUnityExample.scene. Please copy only when necessary.)
- In the WebGL (asm.js) platform, the calculation result of Float type may be significantly different from other platforms. When using the OpenCV's method that use the Mat class (CvType is CV_32F) as an argument, you need to pay attention to the calculation precision.
- Enable Multithreading support.
    1. Remove "OpenCVForUnity/Plugins/WebGL/2019.1/opencvforunity.bc" and then move "OpenCVForUnity/Extra/webgl_multithread/2019.1/opencvforunity.bc" to "OpenCVForUnity/Plugins/WebGL/2019.1/" folder.

Linux

1. Build the OpenCV library.
2. Rename output files (libopencv_*.so.4.5.0).

```
sudo apt-get install rpl
rpl -R -e .so.4.5 "_4_5.so" libopencv_*.so.4.5.0
rename "s/".so.4.5.0"/"_4_5.so"/;" libopencv_*.so.4.5.0
```

3. Copy libopencv_*_4_5.so to "/OpenCVForUnity/Plugins/Linux/x86_64" folder.

UWP

1. Build the OpenCV library.

```
cd C:\Users\satoo\Desktop\opencv\platforms\winrt
setup_winrt.bat "WS" "10.0" "x64"
```

2. Copy "install\WS\10.0\ARM\ARM\vc15\bin" to "OpenCVForUnity\Plugins\WSA\UWP\ARM". Copy "install\WS\10.0\x64\x64\vc15\bin" to "OpenCVForUnity\Plugins\WSA\UWP\x64". Copy "install\WS\10.0\x86\x86\vc15\bin" to "OpenCVForUnity\Plugins\WSA\UWP\x86".

Q & A

Q1.

Asset package size is large. Is there a way to reduce?

A1.

Please remove plugin folders of non-output target platforms that are included in OpenCVforUnity package. You do not need to import plug-in files for platforms not supported by your project.

Q2.

Support Web platform?

A2.

Since the Unity Web Player does not support the native plugin, "OpenCV for Unity" does not support "WebPlayer Platform".

A WebGL platform was added as an alternative. (Unity 5.3 or higher).

Q3.

How do learn the details of OpenCV's method and argument?

A3.

Please refer to OpenCV official document (http://docs.opencv.org/4.5.0/index.html) and OpenCV Tutorials (http://docs.opencv.org/4.5.0/d9/df8/tutorial_root.html) for the details of the argument of the method..

Q4.

How can I convert Mat class operators defined in C++?

A4.

Way to translation of Mat class operators defined in C++.

https://enoxsoftware.com/opencvforunity/way-to-translation-of-mat-class-operators-defined-in-cpp/

Q5.

"DllNotFoundException: opencvforunity" is displayed on the console when run the example scene.

A5.

The plugin does not seem to be loaded correctly. Please check the setup procedure.

Q6.

"ArgumentException: The output Mat object has to be of the same size" is displayed on the console when run the example scene.

A6.

After having setup Plugin, Plugin may work well when you reboot Unity.

Q7.

"Level 'Texture2DtoMatExample' (-1) could not be loaded because it has not been added to the build settings." is displayed on the console when run the example scene.

A7.

Please add all of "***.unity" scenes into the "Assets/OpenCVForUnity/Examples" folder to [Build Settings] – [Scene In Build].

Q8.

In DetectFaceExample or WebCamTextureDetectFaceExample, red rectangle is not displayed around a face.

A8.

You might have failed to read the "haarcascade_frontalface_alt.xml". Please confirm whether there is the "StreamingAssets" folder at the right position.

Q9.

[iOS]Submit to App Store issues: Unsupported Architecture x86, i386"Unsupported Architecture. Your executable contains unsupported architecture '[x86_64, i386]'."

A9.

http://ioscake.com/submit-to-app-store-issues-unsupported-architecture-x86.html
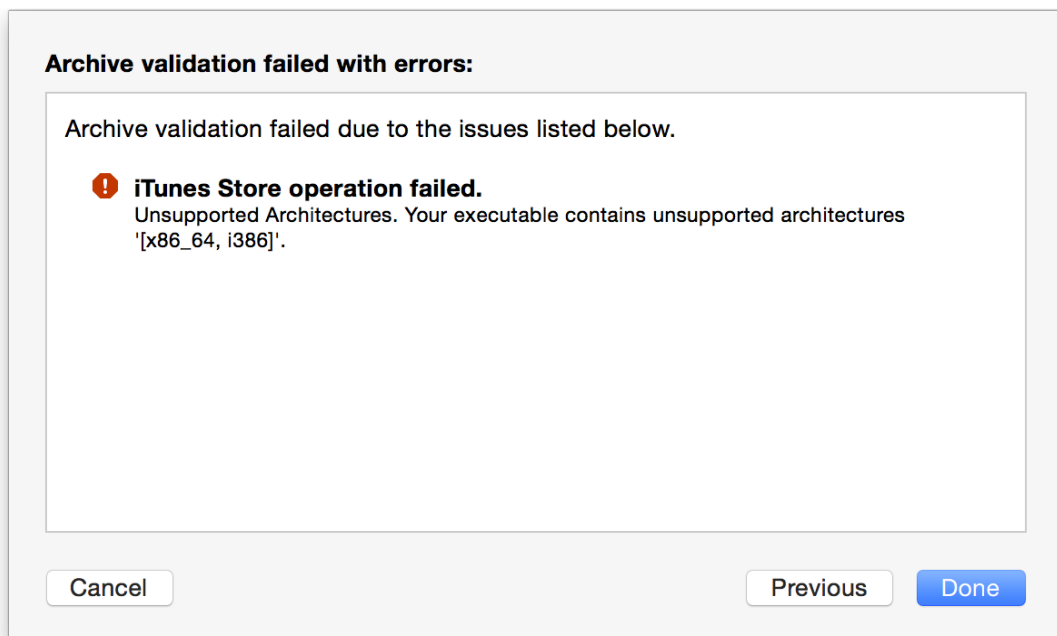

"The problem is that the Buy framework contains a build for both the simulator (x86_64) and the actual devices (ARM).

Of course, you aren't allowed to submit to the App Store a binary for an unsupported architecture, so the solution is to "manually" remove the unneeded architectures from the final binary, before submitting it."

There are **two ways** to solve this error.

1. Please add the script of this page to BuildPhases->RunScript.
    http://ikennd.ac/blog/2015/02/stripping-unwanted-architectures-from-dynamic-libraries-in-xcode/
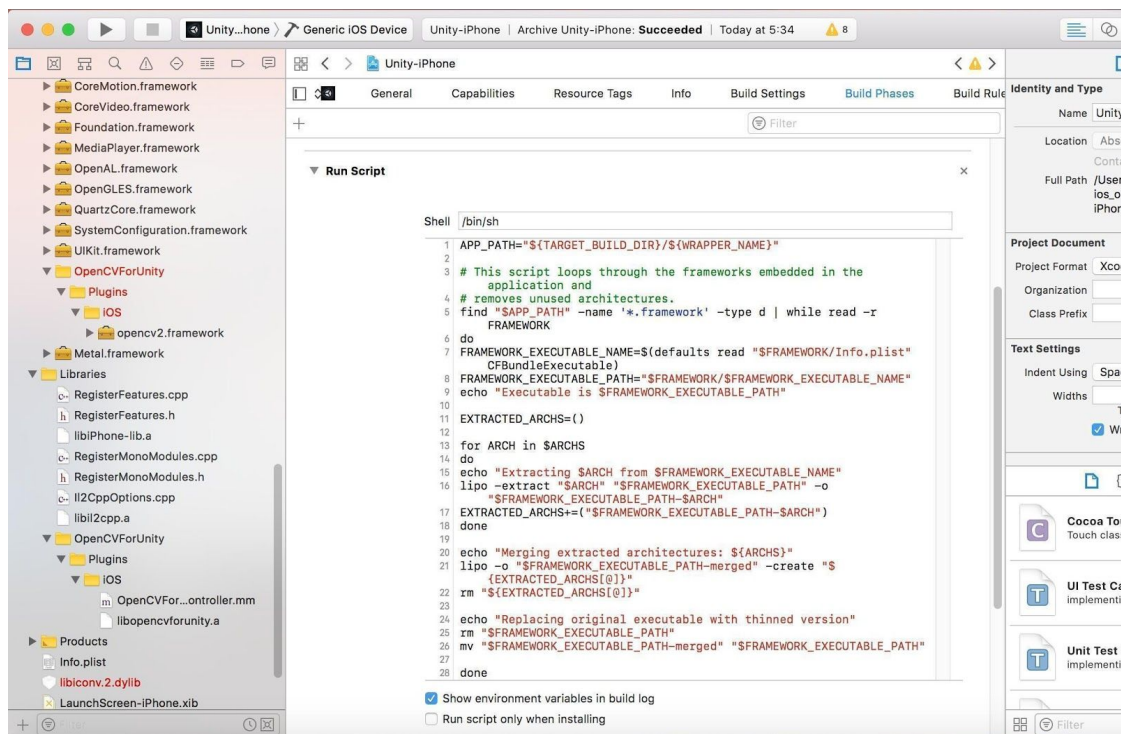

2. Please execute the following command on terminal.
https://stackoverflow.com/questions/42641806/check-and-remove-unsupported-architecture-x86
-64-i386-in-ipa-archive

//remove i386 architectures.
lipo -remove i386 opencv2.framework/opencv2 -o opencv2.framework/opencv2

//remove x86_64 architectures.
lipo -remove x86_64 opencv2.framework/opencv2 -o opencv2.framework/opencv2

//check the architectures.
lipo -info opencv2.framework/opencv2

Q10
How can I use SIFT or SURF algorithms?
A10.
The native library included in OpenCVForUnity is built with the OPENCV_ENABLE_NONFREE
flag disabled.   To use the SIFT and SURF algorithms, rebuild OPENCV library with
OPENCV_ENABLE_NONFREE enabled. For more details, see the section on "How to
use OpenCV Dynamic Link Library with customized build settings" in this document.

Q11.
How to catch native OpenCV's errors code (CVException handling)
